**Independent Tests Prove Exotics Unbeatable!**

Batavia, IL (February 17, 2015) – An independent robot club test performed at Golf Laboratories, Inc. in San Diego, California, confirms that the Exotics E8 Beta fairway wood is truly the longest fairway wood in golf. The E8 Beta was tested against the newest fairway woods on the market and the results continue to support ‘Exotics legendary distance’ reputation and distinguish the technology as the best in the market place.

“The E8 Beta fairway wood dominated this test,” stated David Glod, president and founder of Tour Edge Golf. “The advanced Beta Titanium cup face is the leading factor in its success. Titanium is stronger than other materials which allows us to make it thinner for more spring like effect and faster ball speeds, equaling more distance. Our cup face technology combined with combo brazing is our perfect recipe for maximum distance and performance.”
